---

## PROFESSIONAL PROFILE

---

Business Analyst in a CQC-regulated care provider operating care homes and domiciliary services (~250 staff, 300+ clients, live Tier 1 contract with Essex County Council), acting as the bridge between senior leadership, operations and system vendors. Four years' experience across regulated care, financial services and commercial operations, covering requirements elicitation, as-is/to-be process mapping, KPI frameworks and reconciliation design, delivered through Power BI, advanced Excel and Power Query. Track record of taking ambiguous operational problems to signed-off, adopted solutions: reduced payroll hour discrepancies from approximately 14% to under 5%, and cut a weekly reporting cycle from approximately four hours to under one. Works AI-augmented, using AI to accelerate documentation and analysis drafting, with verification against source data before anything reaches a stakeholder. Currently completing PL-300, ECBA, AZ-900 and AI-900 alongside a full-time role.

## KEY SKILLS

---

**Business analysis:** Requirements elicitation and workshops, user stories and acceptance criteria, as-is/to-be process mapping, gap analysis, KPI and metric definition, business case development, UAT and phased rollout, stakeholder engagement at director, operational and vendor level, BABOK-aligned practice

**Technical:** Power BI (data model, DAX, published operational dashboards), Advanced Excel, Power Query, Power Automate, SQL (intermediate), Microsoft 365 administration, APIs and applied AI tooling

**Systems:** Care management and rostering platforms, HR and compliance systems, finance and payroll systems, Tableau, multi-platform banking reconciliation

**Regulated-sector BA:** Translating CQC and commissioner reporting obligations into system requirements and metric definitions, requirements traceability for regulatory evidence, designing controls that withstand audit and inspection, managing change across clinical, operational and finance stakeholders

**AI-augmented delivery:** Uses AI to compress documentation and analysis cycle time, with source-data verification as a non-negotiable control step

## EMPLOYMENT HISTORY

---

### Business Analyst — Operations & Data

Jan 2026 – Present

*Glenavon Care Limited, Chelmsford — CQC-regulated care provider (care homes and domiciliary services); ~250 staff, 300+ clients, live Tier 1 Essex County Council contract*

- Designed and delivered a planned vs actual vs absence reconciliation model across rostering and HR systems, cutting monthly payroll hour discrepancies from ~14% to under 5% and removing 1–2 hours of misstated pay per affected employee.
- Built a Power BI reporting suite on visit-level rostering data covering target hours, hours leakage, revenue by service area and live staffing, used daily by coordinators and operations, weekly by senior management and monthly across departments.
- Restructured six-monthly ECC commissioner reporting from a multi-department assembly exercise (~18 person-hours) into a single-analyst extract from the model (~6 hours), and cut recurring weekly reporting from ~4 hours to under 1 using Excel and Power Automate.
- Elicited requirements from directors, the registered manager, coordinators and payroll; documented process definitions, metric logic and acceptance criteria; secured director and registered-manager sign-off from prototypes ahead of phased rollout.
- Defined a single KPI baseline across workforce utilisation, service delivery and contract compliance, replacing siloed care, HR and finance reporting; agreed variance tolerances and data quality controls with operations and payroll.
- Drove adoption through role-based training so each user group applies the reporting to its own decisions; currently scoping proactive alerting to reduce late and missed calls.

### Business Support Analyst

Jun 2024 – Jan 2026

*Glenavon Care Limited, Chelmsford*

- Built a financial reporting framework covering £1M+ in annual budgets, producing 12 structured reports and contributing to a 15% reduction in cost variance.
- Redesigned the HR onboarding pipeline across 20 programmes and 9 policy frameworks, reducing onboarding cycle time by 24% while maintaining regulatory compliance.
- Rebuilt 10 core processes across 5 departments, removing undocumented process drift and improving workflow efficiency by ~25%.
- Analysed 12 months of operational and financial data across 5 planning initiatives, improving resource allocation accuracy by 20% for leadership capital decisions.
- Consolidated operational datasets into executive dashboards and board-level packs using Excel, Power BI and Tableau.

### Reconciliation & Data Analyst

Jul 2023 – Jun 2024

*JLL, Norwich — multi-entity property and client financial operations across five banking platforms*

- Executed 30+ daily and monthly bank and balance sheet reconciliations across five platforms for clients including Aviva, M&G and JLL Voyager, with zero material errors in tenure.
- Investigated and resolved 50+ monthly discrepancies across holding and controlling accounts, applying root-cause analysis to identify transaction failure patterns and implement process corrections.
- Produced 20+ custom financial reports and 15+ reconciliation documents monthly, cutting client response times by 30% through standardised, low-rework output.
- Introduced a maintenance scheduling framework that reduced system downtime by 20% and improved overdrawn account tracking accuracy by 25%.

### Business Development & Commercial Analyst

Dec 2022 – Jul 2023

*Kronus GB Limited, Norwich*

- Built financial models and scenario frameworks across 5+ expansion scenarios, translating portfolio data into leadership-level recommendations.
- Identified operational inefficiencies that reduced operating expenditure by 10%; supported contract pricing analysis contributing to a 25% increase in profit margins.
- Designed and facilitated 10+ stakeholder engagement sessions, removing structural delays between operational and commercial teams.

## EDUCATION

---

MSc International Business — University of East London, 2020–2021

BA Economics — University of Calicut, 2017–2020

## CERTIFICATIONS & TRAINING

---

McKinsey Forward Programme — McKinsey & Company, completed July 2026. Structured programme in structured problem solving, adaptability, communication and digital fluency.

In progress (self-funded, 16-week parallel programme): PL-300 Power BI Data Analyst · ECBA (IIBA, BABOK v3) · AZ-900 Azure Fundamentals · AI-900 Azure AI Fundamentals

Completed: Requirements Elicitation for Business Analysis: Stakeholder Conversations · Managing Data with Microsoft 365 · AI Fluency Framework & Foundations · Claude 101 · Gen AI Essentials

## ADDITIONAL INFORMATION

---

- Portfolio (case studies published in anonymised form, [rameessaleem7.github.io/ba-portfolio/](https://rameessaleem7.github.io/ba-portfolio/)): a rota/payroll reconciliation and Power BI reporting suite covering as-is process capture, requirements and user stories, metric definitions, reconciliation logic and a Power BI model on visit-level rostering data, rebuilt on synthetic data for publication.
- Designed an inspection-readiness tracking model: matrix structure and gap-detection logic tracking staff files, training, appraisals and supervision against regulatory requirements across a 136-file estate.
- Built a skills matrix and 2026–2029 development roadmap, capability-tiered as proven / working / developing.
